navigating ai risks:
The AI Ethics that Leaders Need to Know

PROGRAM OVERVIEW:
AI is powerful, but with great power comes great responsibility. This workshop will empower you to navigate the ethical challenges of AI, from bias and transparency to compliance. Learn how to implement AI responsibly and protect your organisation from risk.

KEY LEARNING OUTCOME:
- Identify the ethical risks of AI and how to manage them.
- Understand how data privacy laws impact AI adoption.
- Build a framework for responsible AI use in your organisation.

WHO SHOULD ATTEND?
- Leaders and decision-makers overseeing AI projects.
- Compliance and risk professionals navigating AI ethics.

INLCUSIONS:
- A checklist for ethical AI implementation.
- Case studies showcasing real-world ethical dilemmas.

DURATION:
- 90 minutes

PROGRAM PREREQUISITES:
None.

DETAILED OUTLINE:
- Spotting the red flags: Bias, transparency, and data privacy.
- Managing risks with a practical framework for responsible AI.
- Hands-on: Evaluate a sample AI project for ethical risks.
- Building trust: Your next steps for ethical AI adoption.
